

# 1. Docker Cheat Sheet

## 2. Basics

- 3. `docker --version` # Check Docker
- 4. `docker ps` # Running containers
- 5. `docker ps -a` # All containers
- 6. `docker images` # List images

7.

## 8. Containers

- 9. `docker run hello-world` # Run test
- 10. `docker run -it ubuntu bash` # Run & enter container
- 11. `docker start container_id` # Start container
- 12. `docker stop container_id` # Stop container
- 13. `docker rm container_id` # Remove container

14.

## 15. Images

- 16. `docker pull nginx` # Download image
- 17. `docker build -t myapp .` # Build from Dockerfile
- 18. `docker rmi image_id` # Remove image

19.

## 20. Useful

- 21. `docker logs container_id` # Show logs
- 22. `docker exec -it cont bash` # Exec into container
- 23. `docker-compose up -d` # Run docker-compose
- 24. `docker-compose down` # Stop
